Introduction

This introduction is not part of the Animal Products Notice, but is intended to indicate its general effect.

Purpose

This Notice specifies a value for the 'amount to recover for year' component of the formula for determining the fee payable by dairy export licence holders. This formula is set out in Part 6 of the Schedule to the Animal Products (Dairy Industry Fees, Charges, and Levies) Regulations 2015 (the Regulations).

Background

The Ministry for Primary Industries (MPI) runs a programme to manage dairy exports under quota for butter, cheese, milk powder and prepared edible fat to the following markets:

- a) Dominican Republic
- b) European Union (EU)
- c) United States of America (USA)
- d) Japan

The Regulations empower MPI to charge export licence holders for the certification and reconciliation services it provides. Under the Regulations, industry users who hold an export licence must pay charges calculated using the formula set out in Part 6 of the Regulations.

Section 117(4A) of the Act empowers the Director-General to specify the value of any component of a formula for determining fees or charges.
