Consent to send seeds for testing

If your seeds are a species that do require purity testing (check ‘section 1.9 – Seed imported as pelleted seed’ in IHS 155.02.05: *Seeds for sowing*), your consent below will help to streamline the inspection, sampling and purity testing processes.

We require your consent to send seeds for analysis. Please nominate the MPI approved seed lab you would like to use. Click [here](#) for a list of Approved Suppliers of Pest Identification. The lab will invoice you direct for the analysis. We strongly recommend you get a quote for this service before proceeding.

- Inform the lab if you wish to have your seed returned to you after analysis in the event it is cleared by MPI.
- If you choose not to have the seed analysed we will hold the consignment for a decision regarding reshipment or destruction.

Consent to test (tick one): YES ☐ NO ☐
